

// COVID POLICY

We're doing everything we can to make TAMUhack as safe as possible for attendees and we need your help to do so. In-person attendees must present one of the following at check-in - a negative test* taken on or after January 15th, or proof of vaccination (presented digitally or physically). Failure to satisfy either of these requirements will deny entrance even if an acceptance has been received. Hackers are encouraged to participate virtually if they will be unable to fulfill the preconditions.

*Test must be a negative PCR, antibody, or Curative test (available around the Texas A&M campus and other universities) taken on or after January 15th, 2022. At home tests DO NOT count.
